DEPLOYED PROJECTS

- › cropaicanopy.netlify.app
- › smart-canteen-tau.vercel.app
- › testai-ormin.vercel.app

CORE STACK

Languages

JavaScript · Python · TypeScript · HTML5 · CSS3

Front-End

React · Next.js · Tailwind CSS · Responsive UI · Accessibility

AI / Gen AI

LLM APIs · Prompt Engineering · Embeddings · RAG · scikit-learn

Platform

Git · GitHub · Vercel · Netlify · REST APIs

CERTIFICATIONS

Applied Generative AI

Infosys Springboard · Apr 2026

Front-End Web Developer

Infosys Springboard · Feb 2026

LANGUAGES

Tamil — Native
English — Professional working

PROFESSIONAL SUMMARY

Second-year B.Tech student in Artificial Intelligence and Data Science with three publicly deployed web products spanning computer-vision-assisted agriculture, full-stack ordering, and LLM-powered tooling. Comfortable shipping end-to-end on the React / Next.js + Vercel / Netlify stack, with hands-on Python and applied Generative AI work. Seeking a Summer 2026 software / AI engineering internship to own user-facing features in a production environment.

EDUCATION

B.Tech, Artificial Intelligence and Data Science *Expected May 2029*

Coimbatore Institute of Engineering and Technology — Coimbatore, India

PROJECTS

CropAI · cropaicanopy.netlify.app · React · ML model · Netlify

- › Browser-based crop / leaf-health classifier that returns an instant prediction from an uploaded image — no account, no backend latency, runs on any modern phone browser.
- › Integrated a vision model directly into the React front-end so inference runs client-side on Netlify with zero server cost.
- › Designed a single-screen, mobile-first UI so a non-technical user goes from upload to diagnosis in two taps.

Smart Canteen · smart-canteen-tau.vercel.app · Next.js · Vercel

- › Shipped a full ordering flow — live menu, cart, and checkout — for a campus canteen scenario, deployed continuously from GitHub to Vercel.
- › Built persistent client-side cart state so a user can return to an in-progress order without re-selecting items.
- › Authored a mobile-first responsive layout that holds together cleanly across phone, tablet, and desktop breakpoints.

TestAI · testai-ormin.vercel.app/dashboard · Next.js · LLM API · Vercel

- › Dashboard-based testing tool that uses an LLM to generate topic-driven questions and grade free-text answers in real time.
- › Designed and iterated the prompts for question generation and answer evaluation until outputs were stable across multiple subject areas.
- › Wired up auth-gated routes and a per-user history view on a Vercel deployment.

EXPERIENCE

Front-End Web Development Intern — CodeAlpha (Remote) *Nov 2025 – Dec 2025*

- › Delivered the program's task track in HTML, CSS, and JavaScript, with each project reviewed against the submission spec.
- › Refactored static markup into a component-based structure to cut duplication and standardize styling across screens.
- › Used Git + GitHub for every deliverable — feature branches, pull requests, and tagged submissions.
